

Solutions for Sustainability: An Introduction to Permaculture Design

Email: dillon.cruz72@yahoo.com for more information and to register.

Date and Location:

Saturday March 29, 2014 Clinton, CT Location address will be given upon paid registration

Time: 1:00- 5:00 p.m.

Cost: Sliding scale \$40-60 Pre-registration and payment required. Space is limited.

Class Description: Join certified Permaculture teacher Dillon Naber Cruz for an inspirational afternoon and a detailed introduction of Permaculture Design. Permaculture design encompasses local food ways, ecological restoration, community building, right livelihood, and global regeneration. Class topics include:

- Permaculture defined
- The state of the world
- Ethics of Permaculture
- Principles of Permaculture
- Site tour of an emerging 5 acre permaculture site

Class Facilitator: Dillon Naber Cruz is a certified Permaculture Designer and Educator. He received his Permaculture Design Certificate (PDC) from the Ecovillage Training Center in Summertown, TN and his Advanced PDC in Permaculture Teaching from Cascadia Permaculture in Arcosanti, AZ. His experience in permaculture has taken him from Lancaster County, PA to the Big Island of Hawai'i. He has designed home scale gardens, hugulkultur beds, and a one acre fruit and vegetable farm featuring passive on contour irrigation, mixed polycultures plantings and nitrogen fixing ground covers to build soil fertility. As a teacher he has lead two PDC's, one in Lancaster, PA and one in North Kohala, HI as well as teaching interns organic gardening and intros to permaculture. Dillon is an avid student of permaculture, bioregionalism, and ecology. He can often be found hiking in the woods with his wife taking photos of plants and fungi.

Pre-registration is required. Class attendees are encouraged to wear sturdy shoes or boots and appropriate clothing for the season for the site tour.
