The Rocket Mass heater is an efficient, clean and cheap method of heating, using 50% less wood. They are built using cob and recycled materials. It has the possibility of a wood fired oven and much more. Anyone can learn to build these beautiful heat sources on their own!

- Working hours: 9.00-17.00 plus evening session from 19.00-20.30
- Preparation: Please read 'Rocket Mass Heaters' by Ianto Evans and Leslie Jackson, Cob Cottage Publications, which may be ordered online at <http://www.rocketstoves.com/>
- Working gear: Please bring with your working clothes, safety boots, tape measure and pencils
