# SOLAR DEHYDRATOR

The **WheatonATC1 Model** Solar Dehydrator plans offer *materials and dimensions* to guide builders in the construction of their own solar dehydrator.

The **WheatonATC1 Model** Solar Dehydrator was designed by Wheaton Labs ATC Class of 2017 and is currently in testing at Wheaton Labs, Montana.

The **WheatonATC1 Model** features: efficient framing, recycled glass roof w/ overhangs on all sides, a second solar collector, and simple 45 degree angles.

The **WheatonATC1 Model** Solar Dehydrator was built to dehydrate *fruits and vegetables* while securing them from insects, vermin, and rain.

The **WheatonATC1 Model** Solar Dehydrator plans can be purchased at the location provided in the title block below.
